

| SPECIFICATIONS | HV150 |
| :---: | :---: |
| Weight Capacity | $1-150$ lbs． |
| Sensitivity | 20 micro inches |
| Maximum Diameter | 24 inches |
| Motor | 1 Hp |
| Machine Depth | 29 inches |
| Machine Width | 40 inches |
| Net Weight | 1800 lbs． |

BalanStar HV150
Our BalanStar ${ }^{\circledR}$ vertical hard－bearing balancing machines offer state－of－the－art digital electronics for fast，efficient，cost－effective balancing of your rotating parts．Standard machines are single plane balancers；two plane balancers are available．

We specialize in：
－Machined castings
－Gears
－Flywheels
－Pulleys
－Fans／Blowers
－Automotive／Heavy duty
－Clutch plates／torque converters
We can add time－saving features like drill presses，milling stations and welding stations for maximum through－put，while minimizing your upfront cost．Ask us about automation features as well．

Industrial Balancing Machines

## BALANGTAR CロRPロRATIロN

170 S．Lively Blvd．• Elk Grove Village，IL 60007 • USA
Phone：1－847－352－5034 Fax：1－847－278－8316
www．balanstar．com

## General Specifications

1．Instrumentation sensitivity：
2．Maximum sensitivity：
3．Minimum Unbalance expressed in inches of mass displacement achievable under ideal conditions with a test rotor：
4．Instrumentation speed range：
5．Unbalance reduction ratio：
6．Maximum diameter allowed：
7．Single Plane and Two Plane options
8．Motor Drive：
9．Voltage：
0.000010 oz．in．
0.001 oz．in．
.000020 in．
60－7200 RPM
up to 95 \％
24 in．
1 hp （0．75 kw）
240 ／ 480 VAC， 3 Phase

## Electronic Data

1．Operating System
2．Processor
3．Main Motherboard
4．Hard Drive
5．Digital Aquisition Card
6．Analog To Digital Chipset
7．Linear Power Supply
8．Computer Power Supply
9．Power Source
10．Power Requirement

Windows 10N Pro
Intel Braswell 1．6 GHz
Mitac PD14R1 PC Mini－ITX form factor
SATA 128 GB Solid State Hard Drive
Propriotory to BalanStar Corporation
AD677JN
Low Ripple＋12 V，$-12 \mathrm{~V},+5 \mathrm{~V}$
350W ATX
$120 / 230$ VAC $50 / 60 \mathrm{~Hz}$
1．5 Amp

## Instrumentation Features

1．Two Plane－Static／Couple（Force）－Single Plane balancing modes
2．Electronic Zeroing：electronic compensator of the initial unbalance of a rotor to simplify checking of machine calibration．Also known as Single Compensation．

3．Tooling Compensation：electronic double compensator for minor tooling errors， to eliminate requirement for mechanically biasing the tooling．

4．Keyway Compensation is a standard feature．
5．ISO－1940 Balance Tolerance Calculator is a standard feature．
6．Segment balancing is a standard feature for single plane mode．
7．Unbalance units selectable：ounces，grams，kg，Newtons，inches，mm，cm，m．
8．Location of unbalance will be displayed in degrees of rotation．
9．Remote Angle feature uses a rotary encoder to display the real－time part location in degrees of rotation．

10．Rotor Memories：Save unlimited part setups on solid state disk drive．
11．The HBX keeps up to 10 previous balance runs in local memory for easy refer－ ence．

12．Printing of balance run data is standard．Print balance certificates and reports to USB or network printers．PDF format is also available．

13．USB data output is standard．This option saves data runs on the internal solid state hard drive which can then be downloaded through standard ethernet connections to your networked computer or external USB drive．

14．Empirical Calibration Capability（Customized Setups）：Our HBX includes the capability to provide unique rotor specific calibrations for rotors and tooling that require special setup parameters．The computer flags these unique calibrations on the main measuring screen．
